

Secure Online Respirator Clearance

MultiCare has partnered with Vest Safety Medical Services to bring our clients the convenience and control of secure 24/7 online respirator questionnaire review.

Online, In the Field or at Your Facility

The logistics of clearing employees for respirator use is challenging. Eliminate the hassle by switching to MultiCare's online system, powered by Vest Safety Medical.

- *Convenience & efficiency:* Employees can complete questionnaires 24/7 from any computer with internet access.
- *Eliminate errors:* Our system does not allow submission of incomplete forms, and we can pre-set information specific to your respirator program, such as respirator type, clothing and more, to ensure consistent clearance determinations appropriate to the work environment mask type.

Consistent Medical Evaluation Backed up by MultiCare

Respirator Clearance forms must be evaluated by a physician or licensed healthcare provider (PLHCP) capable of independently practicing medicine. Our online medical program was designed by Vest Med's board certified physicians to screen questionnaires with the same medical algorithm they use. The online form automatically asks additional questions as needed based upon individual responses. As a result, employees receive a consistent medical evaluation of every form.

- Most individuals receive an instant PDF clearance certificate online.
- Questionnaires for individuals not cleared instantly are reviewed by Vest medical providers and either cleared, referred for a phone interview, or referred for an exam appointment with a MultiCare Occupational Medicine Provider.

Seamless Customer Service and Billing through MultiCare OccMed

Enrollment, customer service and billing is provided seamlessly through your company's MultiCare Occupational Medicine Account.

Offload Your Workload

Respirator Protection is one of the most cited OSHA violations. Our service is specifically designed to make compliance easy. The designated employer contact receives results and tracks clearances via 24/7 online access. Plus, going paperless with MultiCare Occupational Medicine's Vest service ensures that medical document storage is instantly HIPAA and OSHA compliant.

Let us show you how simple this process can be.
